NO BANANAS

"Yes, we have no bananas" is a song whose lilting notes were good to dance by, twenty-three years ago. Savants have proved since that the song is asinine and in a class with "I faw down and go boom," and I have no doubt they are right. I shall not quarrel with them. However, now that bananas are no longer obtainable except by stealth, and then only with the connivance of the proprietor of one's food emporium, I would like to suggest that the ditty referred to is really symbolic, not of a Southern republic, but of a state of mind, a state of mind which blandly ignores the actual issue. At this point I am going to illustrate my premise by switching to fuel oil and my ration board. What have bananas to do with fuel oil, you will ask? I will tell you.

When the applications for fuel oil went on sale, so to speak, I was lucky enough to get one and that same night I crawled over furniture, knocking objects d'art this way and that, barking my shins and enriching the language while ascertaining the metes and bounds of my humble dwelling. The application went in and was duly buried at the bottom of an avalanche of similar ones. Week after week passed with no coupons. Telephoning was no longer recognized as a means of communication - not even a "Wha'ja want"? was returned from the receiver since it was allowed to remain off the hook at the other end. Finally in person I clawed my way to the front rail of the Ration Board's office like a wildcat on the loose, to be told that my application was "pending". It pended for nearly three months during which, like a bankrupt, I borrowed oil. My credit exhausted, I wrote a pleading letter explaining all and begging for consideration. Then I went in person to submit a duplicate application and finally my original application was found, and the coupons were given me after an exhausting day, along with a reproof for being so persistent.

My letter was never answered until six weeks after its receipt and long after I had finally secured the precious coupons, almost at the point of a gun, as has been related. The reply was very polite. I was advised that my recent appeal for additional fuel rations had been rejected; so sorry, please. Yes they had no bananas.

H.W.J.

CURRENT LIST OF MEDICAL LITERATURE is published weekly and lists of RECENT BOOK ACQUISITIONS are issued several times per year as supplements. The subscription price for both is \$5.00 per year in the United States and \$5.50 per year in other countries. The Recent Book Acquisitions may be obtained separately at \$1.00 per year. MICROFILM COPYING

Army Medical Library
Washington, D.C.

Microfilm copying of the periodical literature of the Army Medical Library was begun by Bibliofilm Service of the U.S. Department of Agriculture in 1936 and continued until September 1940 when an independent service under the auspices of the Friends of the Army Medical Library was established. Due to the expanding needs of microfilm copying for Regular Army and Federal establishments and other calls made upon it in the present emergency, additional equipment and enlarged facilities have been added at public expense. It has now become possible to substitute microfilm copying to a limited extent for interlibrary loans. Microfilms will be sent without charge in lieu of the loan of the books to all accredited medical librarians who prefer them or where books or journals cannot be loaned.

This service should result in a saving for the borrowing librarian since the responsibility for safekeeping and return of the books will be eliminated and no records will be required. The person receiving the microfilm will have no obligation for its return and may retain it for future use.

The total amount of work which can be done on this basis is of course limited by appropriations now available, hence there will be a limitation in the extent of the service, as to quantity. Orders for microfilm copying, except in particular cases, where bulk or commercial work is involved, will not ordinarily be accepted from individuals, but only through libraries, in the same manner as interlibrary loans.

The following postage should be included with each order for microfilm:

Articles totaling up to & including 100 p.	send.... 1½¢
" " " " " 400 p.	" 3¢
" " over 400 p.	send 4 1½¢ stamps... 6¢

Send orders to:
Photoduplication Service
Army Medical Library
Washington, D.C.
